OPP has metrics, some are already part of the PRIA annual report, that could become bowling chart measures (e.g. #waiver requests approved, study costs and study review costs saved, \$savings to industry, # submissions received under the in vitro eye/skin guidelines).

The Draft Alternative Toxicity Report to Congress has some less direct ties to other programs/Regions. I pulled three blurbs from it below (also attached). Maureen Gwinn is the primary ORD POC (also the author of the draft report) but she is unfortunately out of the office.

Not too late for edits. The whole thing is being worked on to include deliverables and measurable outcomes so we can change wording on animals saved.

Most of the work is frankly in OCSPP and ORD. Not sure what on the research side other programs do. Will give it some thought.

**Subject:** animal testing memo - close hold on next steps

I'm meeting with Henry Darwin at 2-230 today to discuss some measures and outcomes that the Administrator wants to add to this memo to make it meaningful and outcome oriented as opposed to just a directive. If our hope is to have this signed next Friday as part of the TSCA at 3, I'll need to finish this process by End of Week and get it back to the Administrator. Who would be the best person in OPP and OPPT to get ideas from on how to make this measurable across the Agency? Any immediate ideas?
